

MEMEX

WHITEPAPER

INTRODUCTION

What's the advantage of using it?

A decentralized meme exchange offers a strong resistance to censorship and any kind of outside control. Since it would be controlled by a network of users, it would be way harder for any party or group to shut it down or manipulate it for their own singular purposes.

In order to make it possible, it needs to be built on a blockchain system or other distributed ledger technology. The blockchain would serve as a

decentralized database, allowing investors and users to record transactions and ownerships in a more secure and transparent way.

Memex's goal is not only to be a place to trade, but to develop tools for creating and curating meme tokens as well. Users will be incentivized to participate in the system by earning different rewards for contributing with memes, curating content and taking place in governance decisions.

Of course we won't say it will be an easy challenge. In order to be successful we need to properly address steps such as scalability, security and regulatory compliance. We are sure, though, with the team's experience and efforts for the past 4 months, that a decentralized meme exchange could offer a powerful new way for users to engage with and support the growing world of memes.

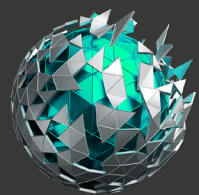

MemeX aims to be the first successful decentralized meme exchange. What does it mean?

The basic idea behind it is to create a platform where users can trade meme tokens without relying on a centralized authority or any intermediary. In other words, the exchange would be ran by a network of users who participate in the system, rather than a single company or organization.

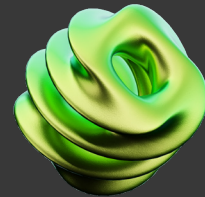

PLATFORM FEATURES

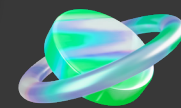

Use any wallet

Connect to MemeX with over 200 wallets and experience quality service first hand.

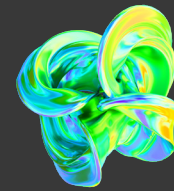

Pro Trading Tools

Get access to instantly filling orders, MEV protection, sandwich attack protection, limit orders and much more, all in a decentralized platform where you sign in with only your wallet.

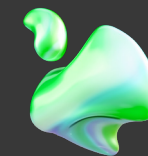

Clear Charts

Use our charting services to plan your next move out professionally and get an edge over other traders. Our charts will allow you to see liquidity points, real time trading data and much more.

Access deep liquidity

MemeX can access billions of dollars worth of liquidity to ensure that your trades go through with near zero slippage, regardless of the amount.

Clean UX

MemeX will be the first ever meme-centered CEX-like platform with a clean and robust user interface and user experience.

AUDIENCE

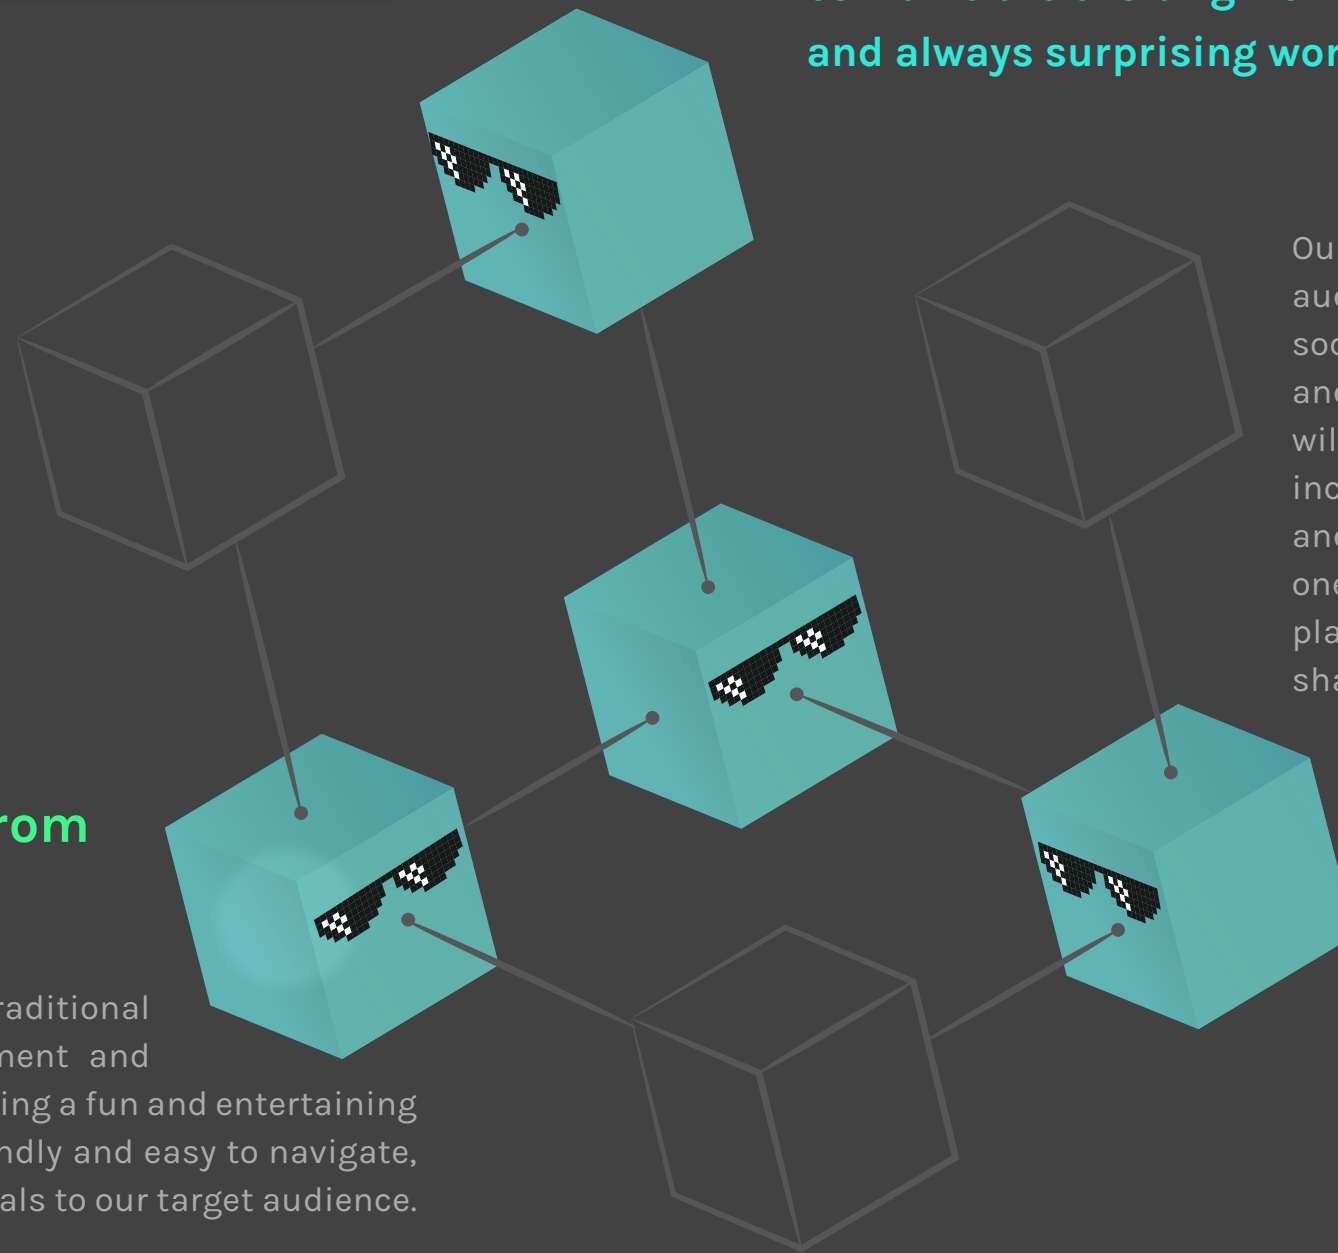

If you are reading this, you should know how hard it is to come up with something unique and useful in this space. While developing the idea and brainstorming the features, we understood that the amount of money that circulates within the world of meme tokens is huge. Therefore, a specialized exchange dealing with meme tokens could combine the exciting world of cryptocurrency with the fun and always surprising world of memes.

Our platform is designed to 'serve' a younger audience that values online entertainment and social interaction, while still providing a reliable and secure platform for crypto trading. Users will be able to trade various cryptocurrencies, including popular memes coins such as Doge and Shiba Inu, but also younger and promising ones, while engaging through our social platforms that will serve to communicate and share thoughts, experiences and memes.

What makes us different from other exchanges, though?

We differentiate ourselves from traditional exchanges by prioritizing user engagement and community building, with a focus on creating a fun and entertaining user experience. Our platform is user-friendly and easy to navigate, with a sleek and modern design that appeals to our target audience.

COMMUNITY

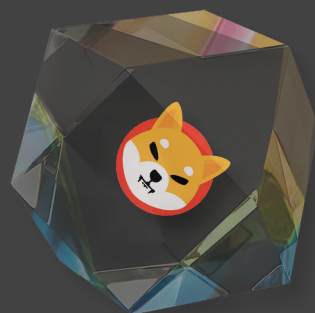

When you think of a successful crypto currency - from alt to 'shit' coins, from multi billion market caps to hundreds of thousands market caps -, you can be sure that the one thing they all had in common is a strong community.

A meme exchange, unlike traditional central exchanges, focuses on a specific niche market - memes. This allows it to tailor their platform and services specifically for meme traders, providing unique features and tools that meet the needs of this particular community.

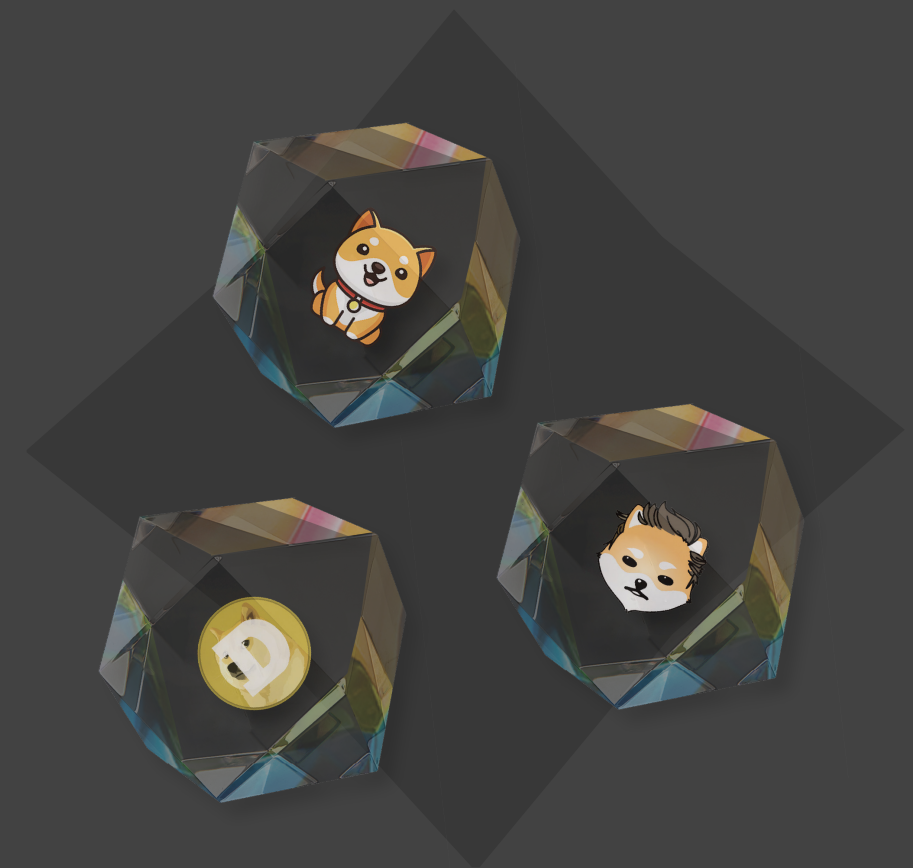

One advantage of meme exchanges is that they often have a more relaxed atmosphere and culture, enabling users to freely express themselves and engage with fellow traders in a fun and humorous way. This can create a strong sense of community and loyalty among users, which can lead to increased engagement and activity on the platform.

MemEX also aims to offer NFTs in the near future .Digital assets that represent ownership of a particular meme or piece of art opens up new opportunities for investing in the meme market, beyond just buying and selling traditional cryptocurrencies.

Moreover, we intend to introduce unique features such as "Meme of the Week" competitions, where users submit their own original memes and the best ones are awarded prizes. This creates an exciting and engaging environment for meme enthusiasts who want to showcase their creativity and potentially earn rewards.

TOKEN

I'm sure most of you have at least once asked the question 'but what is the token for?'

Since our main goal is to build a solid community and offer profit opportunities to everyone willing to trade with us, there will be a place where the revenues generated in the exchange will be going to - the MemeX token.

Our revenue streams come mainly from transaction fees, listing fees for new cryptocurrencies and advertising revenue. We plan to attract users through targeted marketing campaigns on social media platforms and influencer partnerships.

What does it mean?

It means that the chart will keep being pushed with buybacks and burns using the money generated from the exchange multiple ways of revenues.

In addition to that, some other ways that investors will benefit from holders are:

- 1. Reduced transaction fees:** We will implement a system that allows token holders to receive a discount on transaction fees when trading on the platform, incentivizing them to hold and use the token;
- 2. Staking rewards:** Holders could also earn staking rewards by keeping their tokens locked up on the platform for a certain period of time, helping to secure the network and providing an additional incentive to hold the token;

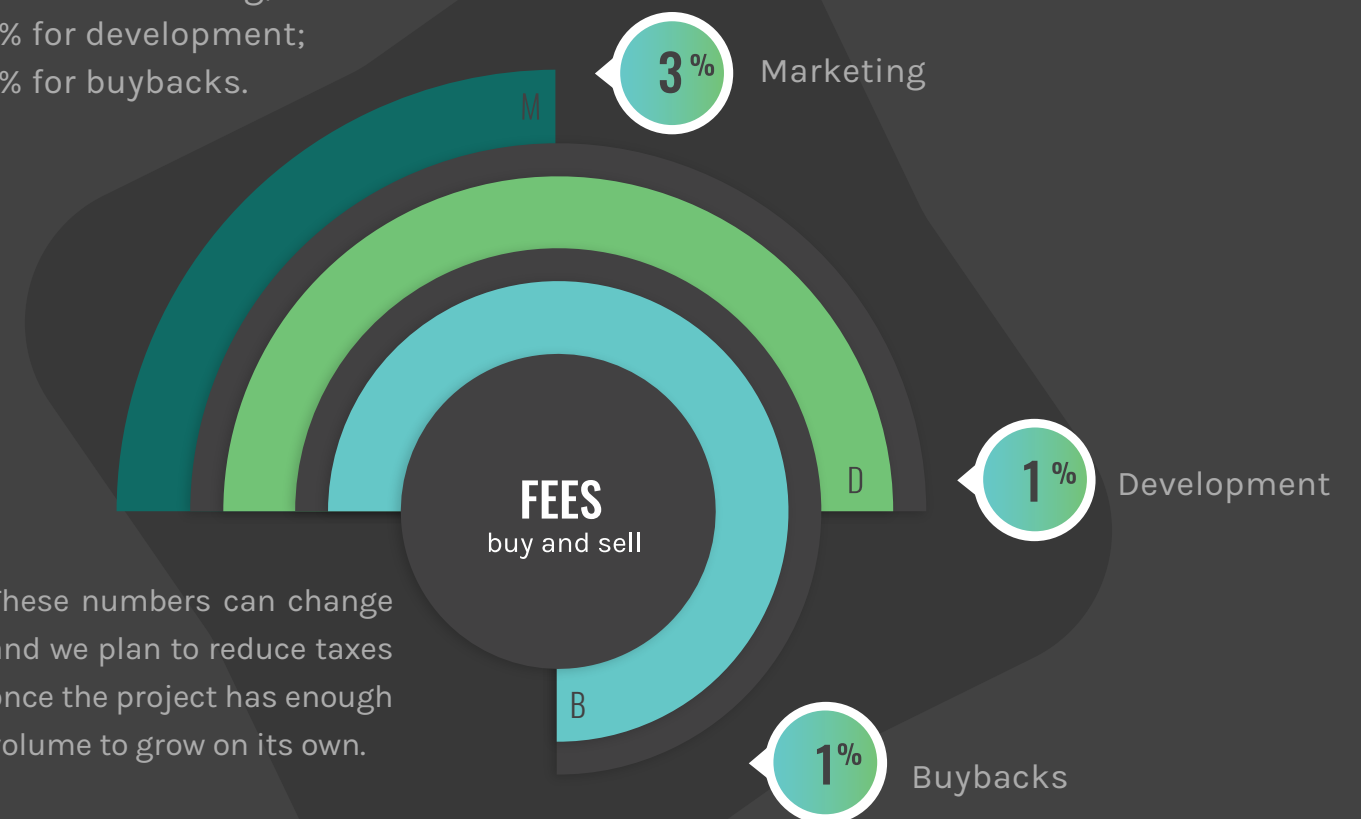

3. Governance rights: Token top holders will be given voting rights in the governance structure of the project, allowing them to have a say in important decisions such as which new assets to add to the platform or how to allocate funds;

4. Airdrops and bonuses: Holders may receive occasional airdrops or bonuses as a way to reward them for their support of the project and encourage long-term holding;

5. Access to exclusive features: Token holders will be given access to certain exclusive features of the platform, such as early access to new asset listings or priority customer support.

MemeX will have a 5% fee on every buy and sell transaction.

3% for marketing;
1% for development;
1% for buybacks.

These numbers can change and we plan to reduce taxes once the project has enough volume to grow on its own.

MARKETING

We will be showing from day one the kind of marketing we are aiming for.

Oh, but everyone says that! What can we expect then?

We have 4 different marketers onboard to help Memex succeed. Each will be focused on a singular area.

Telegram Marketing

Expect the biggest promoters in the space to be talking about it pre and post launch;

Twitter Marketing

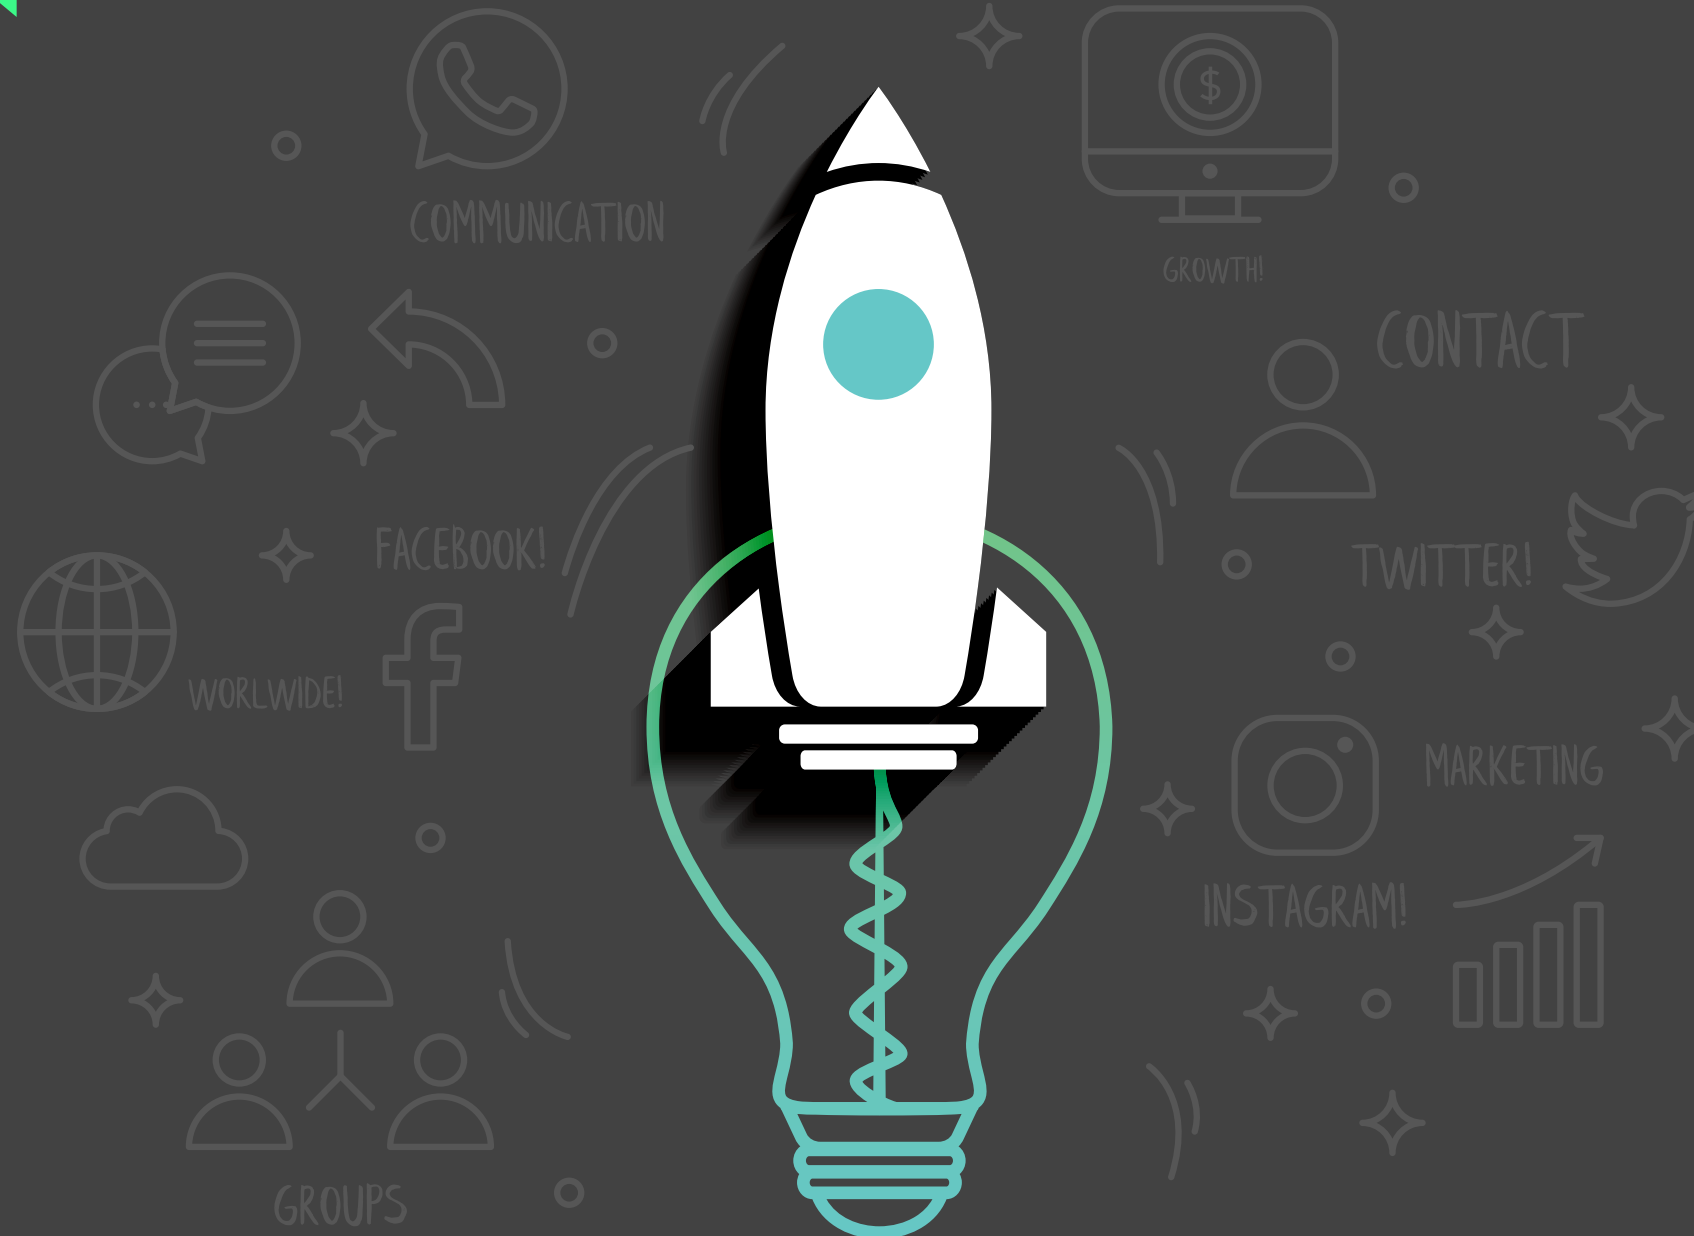

Twitter Spaces, Promoters and trendings will be rolling in;

Crypto Websites

Not only we aim to get CoinGecko and CoinMarketCap in the first hours after launch, we will also be verified in Etherscan, be trending on GeckoTerminal, CryptoMoonShots on Reddit, DexTools Trending and many others;

Real Life Marketing

News Articles, t-shirts, different socials like Facebook and TikTok and eventually celebrities partnerships.

ROADMAP

#1

Develop the platform infrastructure

Build the necessary software and hardware to support the exchange's trading, matching, and clearing processes

#2

Partner with liquidity providers

Secure partnerships with market makers and other liquidity providers to ensure that there is sufficient volume on exchange

#3

Integrate payment gateways

Provide users with multiple payment options by integrating with various payment gateways

#4

Implement security protocols

Establish strong security measures to protect user data and prevent fraud or hacking attempts

#5

Launch and test

Release the exchange to a small group of users to identify and fix any issues before opening it up to the public

#6

Scale the exchange

Once the exchange has proven successful, scale it up by marketing it to a wider audience and increasing trading volumes

#7

Ongoing maintenance and improvements

Continuously monitor the exchange for bugs or vulnerabilities and make necessary improvements or modifications

#8

Expand and diversify

Consider expanding the exchange to offer additional trading pairs, adding new asset classes, or providing value-added services to users

#9

Extras

Dao governance, Meet up point for Meme coins enthusiasts, Nft Marketplace, Platform to support development of tools for creating and curating Memecoin.
